

Environmental Policy

The objective of Gas Data Limited is to be a proud technological and market leader in the innovation, design, manufacturing, supply, installation and maintenance of gas analysis instrumentation and equipment.

To achieve this, the company will work towards creating an effective environmental management system (EMS) based upon ISO 14001:2015 that will be operated in such a way to give the business its best possible reputation, efficiency and competitive advantage.

The company will:

- Work diligently to ensure any damage to the environment is minimised.
- Take a proactive approach to reducing waste and pollution from internal processes and unintentional environmental damage from any other processes.
- Determine and act in accordance with the necessary compliance obligations, and consistently review to ensure fulfilment.
- Provide a clean and safe working environment for all our employees.
- Take management decisions and action them to ensure that is complies with all regulatory and legal requirements deemed applicable to the company's business by the management team.
- Strive for continuous improvement by setting environmental objectives throughout the organisation, starting with a reduction in our carbon footprint with the intention to become carbon neutral.

The continual improvement of the company's environmental management system and its compliance with ISO 14001:2015 is fundamental to its success and longevity and this must be supported by all employees as an integral part of their daily work.
